

SECOND LEVEL FASHION DEGREE
COURSE: MADE IN ITALY / PROFESSOR: FABRIANO FABBRI

On the 2nd of April, at 9.30 a.m., at the Rimini based ZoneModa space of the University of Bologna, a symposium edited by Fabriano Fabbri, President of the Second Level Fashion Degree, will take place under the title of:

THE SAMURAI AND THE WARRIOR

LUMEN ET UMBRA VS. BORIS BIDJAN SABERI

Totally uncommon for the contents and for the importance of the contributors, the event qualifies itself as a moment of reflection deeply zoomed on nowadays subjects, with protagonists two of the most innovative fashion designers in the international scene: the Japanese Issei Fujita, brilliant creative mind of Lumen et Umbra, and Boris Bidjan Saberi, edgy revelation of Parisian runways. On the wake of the best Japanese tradition, Fujita evokes the strength of matter, working on live, organic fabrics, ready to express the energies of Zen cultures through the mastering of "lights and shadows", as the name of the brand goes. Saberi combines the tones of the post-apocalyptic fashion with a mood balancing between the West and the Middle-East, enriched though with suggestions of media products, such as movies, music, videogames, manifested in an incredible modulation of volumes.

The "new urban humanity" of the two fashion designers will be told by the words of important researches of Pop Culture: besides Fabriano Fabbri, Paolo Ferrarini from FCL - Future Concept Lab, Eva Grippa from the national newspaper "la Repubblica" and Gianluca Vitiello from the main Italian radio, Radio DeeJay, will be part of the symposium.
